Jayesh Patil

Full Stack Developer | MERN · TypeScript · Next.js | Fintech SaaS
· REST APIs · Cloudflare | Built Dashboard Eliminating 15hrs/week
Manual Work | Open to Work
Pune District, Maharashtra, India

Summary

Building production-grade full stack applications that solve real business problems — and I have the metrics to prove it. I'm a Full Stack Developer specializing in MERN stack development, with hands-on experience shipping fintech dashboards, SaaS platforms, and e-commerce applications for real clients. My sweet spot? Turning messy manual workflows into clean, automated systems. What I've built: At OneCapital (fintech startup in Pune), I replaced their entire Excel-based data workflow with a unified dashboard system. Before: manually exporting from two financial platforms (AAA Software, Wealth Magic), merging in Excel, visualizing in Power BI. After: real-time auto-sync dashboard pulling data from both sources. Result: eliminated 15+ hours/week of manual work. This earned me a Pre-Placement Offer (PPO) within 2 months as an intern and promotion to full-time Software Developer. As a freelance developer at Divines Code, I've shipped 5+ production MERN applications including: → D2C e-commerce platform (MasalaBrand) → Ayurvedic wellness platform (RiyanShamrit) → Agency websites with conversion-focused UIs → Internal dashboards and admin panels Performance improvements I've delivered: 30% improvement in client operational efficiency 25% reduction in page load time through React optimization 20% faster API response times via MongoDB query tuning My tech stack: Frontend: React.js, Next.js, TypeScript, Tailwind CSS, Zustand, GSAP Backend: Node.js, Express, MongoDB, Supabase, REST APIs DevOps: Cloudflare Workers, JWT authentication, Git workflows I know how to collaborate with cross-functional teams, conduct code reviews, and take projects from first commit to production deployment — because I've done it repeatedly for paying clients. Currently: → Pursuing MCA (Expected 2027) while working professionally → Certified: Deloitte Technology Job Simulation, Sheryians AI-Powered Cohort → Open to: Full Stack Developer, Frontend Developer, or Software Engineer roles at

startups and product companies Let's connect! I'm actively looking for opportunities where I can contribute from day one. Open to full-time roles, freelance projects, and technical collaborations.

Experience

OneCapital

7 months

Software Developer (Full Stack)

December 2025 - Present (5 months)

Pune City

Promoted from Intern to Software Developer based on performance and contributions, where I worked on building and enhancing fintech platforms including investment dashboards and internal systems. Developed scalable frontend interfaces and backend APIs to improve performance and usability, while collaborating with cross-functional teams to deliver production-ready solutions in a fast-paced development environment.

Full Stack Developer Intern

October 2025 - December 2025 (3 months)

Pune City

Worked on fintech web applications, including internal dashboards and data-driven tools, using React.js, Next.js, Node.js, and Supabase. Contributed to both frontend and backend development by building scalable components and APIs, while collaborating with the team in sprint-based workflows to deliver production-ready features.

Divines Code

10 months

Full Stack Developer (Freelance)

June 2025 - March 2026 (10 months)

Nashik

Delivering production-grade full stack web solutions for business clients as a freelance developer, handling everything from requirements gathering to deployment.

Projects Shipped:

MasalaBrand – D2C E-commerce Platform

- Built a complete MERN stack e-commerce solution with product catalog, cart, and checkout
- Integrated payment gateway and order management system
- Deployed on Cloudflare Workers for edge delivery (near-zero latency)

RiyanShamrit – Ayurvedic Wellness Platform

- Developed a content-rich platform with booking system and product showcase
- Built responsive UI using Next.js and Tailwind CSS

DivinesCode Agency Website

- Created a conversion-focused agency website with case studies and contact forms
- Implemented GSAP animations for an engaging user experience

Technical Achievements:

- Delivered 5+ full-stack MERN applications from concept to production
- Built responsive, high-performance UIs using React.js, Next.js, and Tailwind CSS
- Developed secure REST APIs using Node.js, Express, and JWT authentication
- Improved backend performance by optimizing MongoDB queries (~20% faster response time)
- Deployed applications using Cloudflare Workers for cost-efficient and high-performance hosting
- Collaborated cross-functionally with designers and stakeholders to build conversion-driven interfaces

Full Stack Developer Intern

June 2025 - October 2025 (5 months)

Nashik

- Delivered 5+ full-stack MERN applications for real business clients
- Built responsive, high-performance UI using React.js and Tailwind CSS
- Developed secure REST APIs with Node.js, Express, and JWT authentication
- Improved backend performance with optimized MongoDB queries
- Collaborated cross-functionally to build conversion-driven web interfaces

Digi Mirai

Full Stack Developer (MERN Stack)

January 2025 - May 2025 (5 months)

Malegaon

- Built and maintained 3+ MERN stack web applications for real business clients, covering the full development cycle from MongoDB schema design to deployed React frontend
- Developed reusable React.js UI components integrated with Node.js/Express backend APIs, creating consistent, modular interfaces used across multiple client projects
- Delivered production-ready web solutions for business clients, working directly with stakeholder feedback to iterate on features and meet project deadlines
- Contributed to application deployment pipelines across staging and live environments, supporting reliable rollout of production-ready builds
- Participated in structured code reviews within a team development environment, improving code quality standards and strengthening collaborative Git workflow practices

Education

Savitribai Phule Pune University

Bachelor In Computer Application, Computer Science · (May 2021 - April 2024)

NareshIT

.NET Full Stack Developer Course · (May 2024 - January 2025)
